

### Advisory for Indian students planning to study in Estonia

All Indian students planning to join a university/college/institute in Estonia are advised to make necessary inquiries and ensure that the university/college/institute has proper accreditation and recognition in Estonia. It is advisable that students directly approach the college/university/institute for admission instead of applying through agents. Students must also check all the information directly from the university/college/institute regarding duration of the course, course fee and terms and conditions regarding their student visa.
